

**EASTEY'S PROFESSIONAL SERIES
AUTOMATIC L-BAR SEALER WITH SHRINK TUNNEL**

December 4, 2017, Brooklyn Park, MN – Eastey Enterprises, a leading manufacturer of L-sealers, sleeve wrappers, shrink tunnels and bundling equipment, introduces the Professional Series of automatic sealers and shrink tunnels for packaging a variety of products.

The Professional Series automatic sealers were designed specifically for large or heavy products that need to be fully enclosed. The automatic sealers are available with either a hot wire or hot knife seal head and feature a powered takeaway mesh conveyor for easy product transport, and magnetic clamping and automatic cycle timing to ensure a proper seal. Products are automatically sealed after they have been delivered onto the infeed conveyor and fed into the centerfold film. After products have been sealed, the outfeed conveyor takes the wrapped product to the shrink tunnel and another new product is brought to the seal area.

Eastey's automatic L-bar seal head dimensions range from 30" to 50" in length and 50 to 100" wide. Eastey's sealers can be combined with Eastey's Professional Series shrink tunnel to provide a positive shrink of all products. Professional Series shrink tunnels feature a solid state temperature control and four directional air flow with variable controlled air speed for positive shrink on all sides of the product. The tunnel conveyor can be ordered as stainless steel mesh belt, live roller, dead roller or plastic belt. The chamber dimensions range from 20" to 70" in width, and 8" to 20" in height to accommodate a range of different sized products.

The Professional Series sealer and bundling tunnel are available now through Eastey Enterprises network of authorized distributors. Sales inquiries can be directed to Joshua Nelson, Eastey Enterprises, 7041 Boone Avenue, Brooklyn Park, MN 55428, 1-800-835-9344.

Eastey (www.eastey.com) is now a part of Engage Technologies Corporation. Engage Technologies Corporation is the parent company of Squid Ink Manufacturing, Inc and Cogent Technologies, Inc. Squid Ink (www.squidink.com) manufactures industrial ink jet printing equipment and high quality inks for a variety of industrial coding and marking applications, and Cogent Technologies (www.cogent-tech.com) manufactures infrared drying systems used to dry ink in the industrial and graphics industries.

Founded in 1991, the company is headquartered in Brooklyn Park, Minnesota with facilities in Spring Lake Park, Minnesota, Rogers, Minnesota, and Shanghai, China. For more information on the Engage Technologies family of companies, visit the individual websites listed above, or the Engage Technologies site at www.engagetechnologies.net.
